

## 3 Reasons to Light Up Your House Tonight

Your house disappears at night. You paid for the architecture, the stone, and the landscaping, but for 10 hours a day, it's invisible. That is a waste. Larkin Landscape and Design has the solution to make your home stand out 24/7. Here is why you need to install architectural lighting now.

First, you deter crime. Burglars hate light. They look for the dark house on the block. By illuminating your facade and your perimeter, you send a clear message: "We are here, we are watching, and you can be seen." It is the most effective passive security system you can buy.

Second, you prevent accidents. Tripping on a dark step is painful and creates liability. Lighting your paths and stairs protects your family and your guests. It makes navigating your property safe and easy. When you invest in **Outdoor Lighting in Iowa**, you are investing in safety.

Third, you become the envy of the neighborhood. A professionally lit home looks expensive. It looks finished. It stands out from the dark houses around it like a beacon of luxury. It increases your curb appeal instantly.

Don't live in the dark. You have the power to protect and beautify your home with the flip of a switch.

Take action today. Contact us to get your lighting proposal.
